## MARKET TYPES

Every workplace is unique, and thus requires a unique meal service solution. Throughout the years we have been able to categorize our market types into the three typical offerings listed below. We recognize not every workplace has sufficient space for us to move a market into an existing area.

### RETRO-FITTED

- Converts an existing space at your facility that was previously unused, and installs a custom Fresh Market to fit the footprint of the space.
- These spaces should be centralized and accessible to all employees/contractors
- Minimum square footage is dependent on the quantity of people being served at that location

### STAND ALONE

- Mobile trailer unit outfitted with a Fresh Market, installed on-site with entrance/exit fixtures
- Location should be centralized and accessible to all employees/contractors
- Some rental/leasing costs may be associated with this option

### TURNAROUND

- Mobile Trailer outfitted with a Fresh Market
- Intended for temporary use
- Can be parked in a parking lot or other location with wide access
- Some rental/leasing costs may be associated

**CUSTOM OPTIONS AVAILABLE** Please inquire.
